SANLO INC. EXPANDING ITS MANUFACTURING PLANT IN CHANGSHU, CHINA

Michigan City, IN — Sanlo, Inc., a leading distributor of bare and coated cable, cable assembly products and accessories, has announced that it is doubling the size of its Sanlo Cable Manufacturing (Changshu, China) facility to 70,000 square feet under roof and has increased to over 100 employees across two shifts.

The expansion will include a third extrusion line, a second die cast line and the assembly capacity will be doubled. This will provide the required capacity to meet current and new customer requirements.

"Sanlo is committed to the supporting the customer's requirements for the coated cable and cable assembly manufacturing industry in China, and to growing with our customers in this important region of the world market," said Dennis Wolf, Sanlo President and Chief Executive Officer.

Wolf said that by expanding the operations in China, Sanlo continues to enhance its cost competitiveness, increase service to current customers who are moving operations to China, and broadening the product base with North American customers.

About Sanlo Inc.

Since 1957, Sanlo has specialized in custom mechanical cable assemblies and in the extrusion of

vinyl, nylon, and other thermoplastic coatings over aircraft type cable, wire rope and strand. The company services a diverse range of end markets including automotive, security, construction, railroad, medical, aerospace, marine, and general industrial applications.
